## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Examiner has identified Gerace (US5991735) and Taylor (Object-Oriented Information Systems – 1992) as the closest pieces of prior art. Gerace provides content customized to users and achieves this using object-oriented programming (OOP), yet the OOP details of Gerace are minimal. Taylor provides a background for and details on the general OOP approach. However as pointed out by the Board, the claims require an action object associated with a classification and the action object must identify functions that are to be performed in order to generate the customized content. Further, the selector must invoke a classifier object and an action object based on the one or more classifications where the classification is applicable to or based upon current processing system settings. Each of these features are present in each of the independent claims (1, 10, 16, 21).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
